1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page one of the specification, paragraph [0001] has been replaced with the following amended paragraph:

[0001] This is a divisional application of U.S. Serial No. 09/863,933, filed May 23, 2001, now U.S. Patent 6,811,802, which is a continuation-in-part application of PCT/NL99/00701 filed November 16, 1999, which claims priority to Dutch Application No. 1010630 filed November 23, 1998.

The Abstract has been amended to be a single paragraph, as follows:

ABSTRACT OF THE DISCLOSURE

The invention provides methods and moulding devices for moulding three-dimensional products from a mass of foodstuff which is suitable for human consumption, in particular from a mass of meat, in particular chicken. The method comprises filling a mould cavity with a portion of the mass under the influence of a filling pressure exerted on the mass and for a filling period via a filling opening associated with the mould cavity, closing the filling opening of the mould cavity and holding the mass in the mould cavity for a fixing period. Then, the mould cavity is opened and the moulded product is removed from the mould cavity. The method uses fixing-pressure-exerting means which are designed to exert a fixing pressure which acts on the mass in the mould cavity after the filled mould cavity has been closed.
